TOOL ASSEMBLY

| BUILD CHECKLIST | | AUTOCLAVE PRESSURE TEST | |
|--------------------------------------|--|--|----------|
| LINER/IT PLUG LENGTH (156.75") | | To test, pressurize assembled autoclave to 3000 psi (+/- 100 psi). Record this INITIAL pressure below. Wait five minutes to allow for acclimitization. During this time inspect for gross leakage of water or significant pressure drop. If leaks or pressure loss are observed, rectify and retest. At five minutes, record START pressure. Wait 10 minutes, then observe and record END pressure. If pressure loss >60 psi is observed, the test is considered a failure and should be repeated. | |
